

## Sustainable procurement policy

In **Goldair Cargo S.A.** we are aiming to improve our sustainability performance in our supply chain by managing environmental, social and economic impacts of the goods and services we are handling and providing. Thus, we have already in place our ISO 14001 : 2015 certification, regarding “Environmental Management System”. In this respect we aim is to support choices that can impact on the reduction of carbon emissions, the reduction of waste and the support of the local communities.

The objectives of the policy are:

- To comply with all legislation and various stakeholders requirements;
- To promote sustainability to suppliers and contractors;
- To increase awareness of the transportation companies;
- To include sustainability criteria to all supplier evaluations;
- To increase the number of suppliers with CSR certification;
- To reduce the percentage of hazardous raw materials;
- To increase the number of local suppliers.

The baseline of the criteria is:

- Carbon Emission reduction;
- Energy management and reduction;
- Supply Chain Management optimization;
- Disposal management and optimization;
- Respect human rights (i.e. avoid discrimination, protect vulnerable groups).

By complying with this policy, we aim to approach both internally and externally the factors that affect our sustainable procurement practices. Higher management supports the effort for sustainable procurement and the reduction of main negative economic, social and environmental impacts.
